

# Shower Operation

## Instructions

1. Boats have limited hot and cold water so keep showering short.
2. Turn tap to 12 O'clock and it takes about 10 seconds to get hot. Adjust water temp to suit your requirements.
3. Wet yourself and then turn off tap before applying body wash / shampoo.
4. Rinse off soap.
5. Don't shave in the shower as hair will clog the filters

## Flushing Shower Bowl Instructions

1. Whilst still in the shower lean down and press the circular switch near your knee and hold it in for approximately a minute. You will hear the pump working.
2. When the bowl is drained the pump makes a sucking sound and at this stage release the pressure on the switch.
